SKILLS

Languages: C++, Python, C, Java, PHP, JavaScript
Tools/Platforms: MongoDB, Tableau, MS SQL Server, Pandas
Soft Skills: Problem-Solving, Team Player, Project Management

PROJECTS

Crime Pattern Prediction System– AI/ML-Based Predictive Analytics Project Apr' 26

- Developed a Crime Pattern Prediction System using Machine Learning and Data Analytics techniques to analyze historical crime datasets and predict future crime trends.
- Performed data preprocessing and cleaning including handling missing values, duplicate removal, feature encoding, normalization, and transformation for improved model accuracy.
- Implemented ML algorithms such as Logistic Regression, Decision Tree, Random Forest, KNN, and K-Means Clustering for crime prediction and hotspot detection.
- Created visualizations including heatmaps, bar charts, line graphs, and analytical reports to represent crime patterns and prediction results.

Tech: Python, Pandas, NumPy, Scikit-learn, Jupyter Notebook, and MySQL/PostgreSQL

JobDelta | Full-Stack Skill-Gap Analysis Platform May' 26

- Automated Skill Mapping:** Engineered a full-stack platform using the MERN stack (MongoDB, Express, React, Node.js) and PHP to automate the alignment of user skills with job requirements.
- Neural Parser Integration:** Integrated the PDF.js engine to enable client-side resume parsing, allowing for real-time extraction of skill "nodes" directly from PDF uploads without server-side lag.
- Gap Analysis Engine:** Developed a logic-driven engine (using PHP and MySQL) that identifies exact "missing skills" by comparing extracted resume data against job-specific requirements.
- Dynamic Learning Roadmap:** Implemented a "GapCart" feature that automatically populates with missing skill nodes and provides direct links to tutorial resources for user upskilling.
- Skill Verification System:** Created an integrated webcam-based verification module to simulate technical interviews, ensuring candidates meet the required competency levels before final transmission.

Tech: Tailwind CSS, PHP, MySQL, JavaScript

Sport Complex Booking System Jun' 24

- Developed a web-based platform that enables users to book sports facilities digitally.
- Built responsive and user-friendly front-end using HTML, CSS, JavaScript, and Bootstrap.
- Implemented features such as booking management, user registration, and schedule tracking to streamline the reservation process.
- Conducted feasibility study and system analysis for smooth functionality and performance.

Tech: HTML, CSS, JavaScript, Bootstrap, VS Code.

CERTIFICATES

Infosys Course Completion Certificate in Python Programming | *Infosys* May' 24

HackEthics(4 Days Ethical Hacking Workshop) | *Spirit Organization* Nov' 25

Microsoft Learn Student Ambassador | *Spirit Organization* Nov' 25

EDUCATION

Lovely Professional University Phagwara, Punjab
Master of Computer Applications;
CGPA: 8.23 Aug' 25 – Present

Gurunanak Dev Engineering College Ludhiana, Punjab
Bachelor of Computer Applications;
CGPA: 7.65 Sep' 21 – Jun' 24

T.S.S.M Senior Secondary School Ludhiana, Punjab
Intermediate;
Percentage: 82% Apr' 20 – Mar' 21
